SUMMARY

Senior Control Room / DCS Operator with 25+ years of experience in petrochemical, utility, and crusher plant operations. Highly skilled in operating and monitoring process systems, including gas, steam, and utility facilities. Proven expertise in commissioning, start-up & shutdown, troubleshooting, and emergency handling. Strong background in DCS (Honeywell TDC 3000 & Siemens WinCC), with solid knowledge of HSE standards, PTW, LOTO, and plant safety systems. Capable of maintaining safe, efficient, and continuous plant operations in high-risk environments.

SKILLS SUMMARY

Utility & Plant Systems: Boilers (High Pressure), Air Compressors, Nitrogen System, Cooling Water System, Wastewater Treatment, Incinerator, Tank Farm, Fire Water System, Crusher Plant Operations

Safety & Compliance (HSE): Permit to Work (PTW), Lock Out Tag Out (LOTO), Emergency Shutdown System (ESD), Fire & Gas System, Emergency Response Team (ERT), MSDS

Operations & Maintenance: Commissioning & Pre-commissioning, Plant Optimization, Equipment Inspection, Preventive Maintenance Support, SAP Notification Reporting, Crusher Operation & Monitoring

Technical Knowledge: P&ID Interpretation, Process Troubleshooting, Production Monitoring, Data Logging & Reporting, Crushing Process Monitoring

Languages: English (Fluent), Bahasa Indonesia (Native)

WORK EXPERIENCE

DCS Operator – Utility

Cilegon, Indonesia

PT Indorama Petrochemicals

August 2010 – Apr 2026

- Operate and monitor plant processes via DCS (Honeywell TDC 3000) to ensure safe and efficient production.
- Handle start-up, shutdown, and emergency operations for utility and process systems.
- Monitor key parameters (pressure, temperature, flow, quality) to maintain optimal plant performance.
- Coordinate with field operators and maintenance teams for troubleshooting and operational issues.
- Support commissioning and plant optimization activities.
- Ensure compliance with HSE procedures, PTW, and LOTO systems.
- Maintain operational logs, report abnormalities, and support incident investigations.

Control Room Operator – Utility

East Kalimantan, Indonesia

PT Thiess Contractors Indonesia

July 2009 – July 2010

- Managed control room operations and daily plant activities.
- Operated and monitored crusher plant operations to ensure stable production and equipment performance.
- Participated in pre-commissioning, commissioning, and start-up processes.
- Coordinated with operations and maintenance teams for safe plant operations.
- Conducted safety audits and ensured compliance with HSE standards.
- Applied PTW and LOTO procedures in daily operations.

DCS Operator – Utility

PT Polyprima Karyareksa

Cilegon, Indonesia

1999 – June 2009

- Operated and controlled plant systems via DCS under normal and abnormal conditions.
- Performed troubleshooting and handled process emergencies.
- Supervised field operations and ensured production quality.
- Conducted equipment preparation for maintenance activities under PTW system.
- Maintained high HSE standards and operational safety.

Utility Operator

PT Polypet Karya Persada

Cilegon, Indonesia

1995 – 1999

- Supported plant operations, equipment monitoring, and raw material handling.
- Participated in commissioning and start-up activities.

Operator

PT Cold Rolling Mill Indonesia Utama (Krakatau Steel)

Cilegon, Indonesia

1990 – 1995

- Performed daily operational activities and monitored material quality.
- Input operational data and supported production processes.

TRAINING & CERTIFICATION

- DCS Honeywell TDC-3000 Training
- Boiler Operation Training
- Basic Fire Fighting & Emergency Response Team (ERT)
- First Aid Training
- ISO 9000 / 14000 Awareness
- Material Safety Data Sheet (MSDS)
- Work Permit System (Hot, Cold, Confined Space)
- Lock Out Tag Out (LOTO) Procedure

TECHNICAL EXPERTISE – PROCESS & UTILITY SYSTEMS

- Control Room Operation & DCS (Honeywell TDC 3000, Siemens WinCC)
- Gas & Utility Processing Systems
- High Pressure Boiler Operation (LNG & LFO)
- Air Compressor & Nitrogen Systems
- Cooling Water & Demineralization Systems
- Wastewater Treatment Systems (Anaerobic & Aerobic)
- Thermal Oxidizer & Incinerator
- Tank Farm Operations (Loading & Unloading)
- Piping & Instrumentation Diagram (P&ID) Interpretation
- Process Troubleshooting & Emergency Handling

EDUCATION

SMA Sint Louis

Semarang, Indonesia

Graduated: 1990
